

去幾年，這個村接待過許多次的短宣隊，每一位參予短宣隊的弟兄姊妹都印象深刻，也為兒童們帶來許多美好的回憶。在兒童事工上可說是相當有代表性。兒童們一個一個在長大，從小學開始進入中學，甚至植苗青年中最優秀的兩位大學生都是成長在這個村莊，明年就要大學畢業了。

正當暑假期間協調植苗地區教育補助款發放時，得到一個地區傳來信息，由於他們當地居民的經濟狀況已經改善很多，在同工們一起討論後，決定告知我們，他們村莊的家庭過去十三年來，每年持續得到植苗計畫的幫助，現在經過多年的努力，他們在經濟上可以自立了！

這是一個很特別的偏遠山區，村長一家都是教會服事的骨幹，幾位家人也有機會參加神學培訓。植苗事工也在十年前，協助教會加蓋一樓層屋頂，增加教會聚會使用之用。在暑期更可以開放成為夏令營學生的活動中心，晚上則成為短宣隊老師住宿房間。過

陈总早上好🙏
经商议:根据目前大好形势，丹丁植苗儿童家庭生活都很好了，且大部分贫困户都搬迁到城里了，享受极为丰富的恩典待遇，所以植苗资助就此不再领受了。感谢资助者一直以来的爱心帮助，感谢你辛劳付出！上帝祝福！🙏

政府在脫貧攻堅政策下提供各種產業獎勵補助，數年前筆者就親自看到村長帶領村民們在原來是種小麥及玉米的山坡地架起水泥柱，嘗試改種高經濟作物--葡萄。目前產能很好，果實又大又好，滿山滿野都是葡萄園，在經濟上帶給村民更多的收入，改善整個村的生活。大部分貧困戶也都搬遷到城裏，由政府協助找尋打工的機會及各樣社會資源的服務。

看見這個村莊的成長，我們充滿感恩。但是在不同的地區，政府資源的分配也不盡相同，還是有許多地區的發展遲緩，特別在大環境的限制下，偏遠的山區仍在窮乏當中，需要更多的關懷。植苗事工仍然會在有限的資源下，鼓勵與陪伴當地同工一起來關心下一代的身心靈健康成長！

During the summer vacation, while we were discussing the distribution of the educational grants in the Seedling areas, I received a message from a region that informed us that the economic situation in the area had improved so much after years of hard work and the continuous help of the past 13 years from our Seedling Project that they were able to be financially independent.

This is a special remote mountainous area. The chief of the village is also the head of this church. Several family members have had the opportunity to be trained in theology. Twelve years ago, the Seedling Project helped the church add another floor to their building. The increased space became the center of activity for summer camps during the daytime and, in the evening,

room and board for the short-term mission teachers. In the past few years, this village had received many short-term missions and brought many happy memories to the children. This has been a showcase for the children's ministry. The children here grow up together from elementary school to high school. The two best college Seedling students are from this village and are graduating next year.

The government had been providing incentives and subsidies under the Poverty Alleviation Policy. A few years ago, I saw the village chief lead the villagers in turning the hillsides that had used to grow wheat and corn into orchards for grapes, which are high-economic-value crops. The recent yield is very high, and the entire hillsides are full of vineyards loaded with grapes. This brings more income to the villagers and improves the lives of all of the villagers. Most of the poor families have also moved to the city, where they hope the government will assist them in finding jobs or provide other social services.

We are full of gratitude to see this village grow financially. But in different regions, the distribution of government resources is not the same. There are still many areas where development has been slow because of the constraints of the environment. Many remote mountainous areas are still in poverty and require more financial care. Our Seedling Project, with limited resources, will work with the local workers to continue encouraging and taking care of these areas and promoting the physical and spiritual growth of the next generations.
